Flow Chart: The Human Heart

You will design a flow chart that depicts that flow of blood through the human heart starting with the right atrium, and ending in the right atrium. Use your textbook or the Internet to find the information that you need. Make sure that you list names of all the vessels, chambers, valves, and parts of the body that blood will travel through during this process. Use the following symbols to make your flow chart. Remember this is a chart, not a diagram. All I am looking for are the symbols and names. An example is provided.

Direction

Start or Stop

Name

Body Part

Right Atrium

Tricuspid Valve
