Catapult Design Worksheet

Problem: You are an engineer who specializes in designing cool toys and machines for games. You were recently contacted by the SuperFun Toy Company to help design a machine called a catapult for a game that will launch Ping-Pong balls at a series of targets. To ensure that children and adults alike will love the game, you need to make sure the catapult is both accurate and precise.

Constraints: The only building materials available to you are listed below.

Materials:

Popsicle Sticks

Masking Tape

Straws

Rubber Bands

Plastic Spoons

Cardboard Base (1 per group)

<u>Imagine:</u> Brainstorm several ideas you have for how to use the above materials in your catapult. Draw pictures!

Name:	Date:	Class:
		-

<u>**Design:**</u> Draw out your group's best catapult design. Be sure to label where you will use all of the different materials (Popsicle sticks, tape, plastic spoon, etc.).

<u>Build:</u> List how much of each material you will need to build your catapult. Once your design and materials list are complete, you may collect materials from your teacher. Make sure you labeled the materials in your design!

Item	# needed
Cardboard Base	1
Popsicle Sticks	
Masking Tape	
Straws	
Rubber Bands	
Plastic Spoons
