Electricity and Magnetism

Please circle the **best** answer.

- 1. True or False: Electricity is a form of energy.
 - a. True
 - b. False
- 2. How is electricity formed?
 - a. Transfer of protons
 - b. Transfer of atoms
 - c. Transfer of electrons
 - d. Transfer of neutrons
- 3. What are the two types of electricity?
 - a. Fast and slow electricity
 - b. Static and current electricity
 - c. Hot and cold electricity
 - d. Proton and electron electricity
- 4. True or False: A magnet has four poles: a north, south, east and west pole.
 - a. True
 - b. False
- 5. Engineer's use magnets and magnetism to produce a lot of different things.

 Which of the following is **NOT** produced using magnets?

Which of the following is **NOT** produced using magnets?

- a. Memory storage
- b. Images of the human body
- c. Building a house
- d. Sort recyclable materials
- True or False: An electrical circuit is any path electrons can move through.
 - a. True
 - b. False
- 7. Electrical current can easily travel through materials like metals.

What are these types of materials called?

- a. Insulators
- b. Resistors
- c. Batteries
- d. Conductors
- 8. True or False: You cannot make a battery out of fruit.
 - a. True
 - b. False
