## **Learning about Renewable Energy**

What is renewable energy?

List five different types of renewable energy:

- 1.
- 2.
- 3.
- 4.
- 5.

How does choosing to use renewable energy help the Earth?

List two solid fuels and two non-solid fuels.

Explain one way in which these fuel types are different.

Explain how the use of solid fuels can be harmful to people's health.

## **Vocabulary Words to Know**

renewable water geothermal emissions
non-renewable solar pollution global warming
wind biomass energy climate change
