

Elevator RobotC Programming Guide

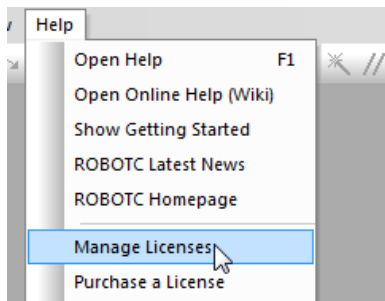

1. Download the free trial RobotC programming language for LEGO NXT at www.robotc.net.

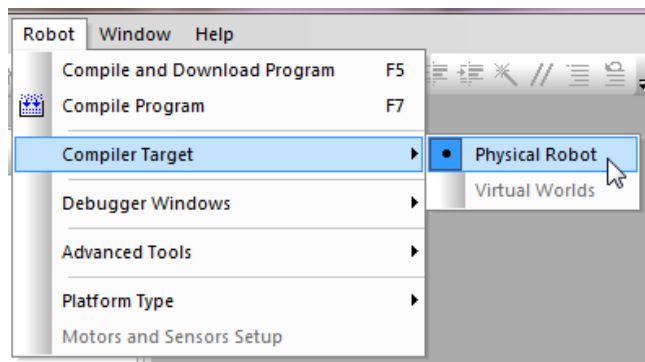

2. Follow the instructions to install RobotC.
3. Open RobotC.

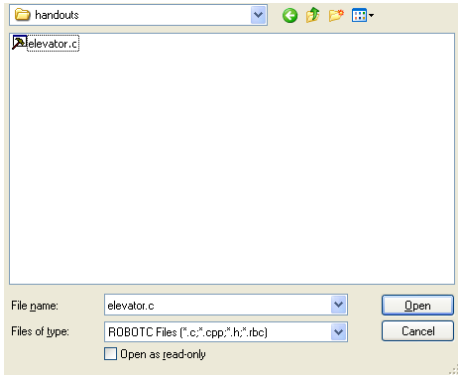

4. Activate the free trial license by going to Help > Manage License > Add License.

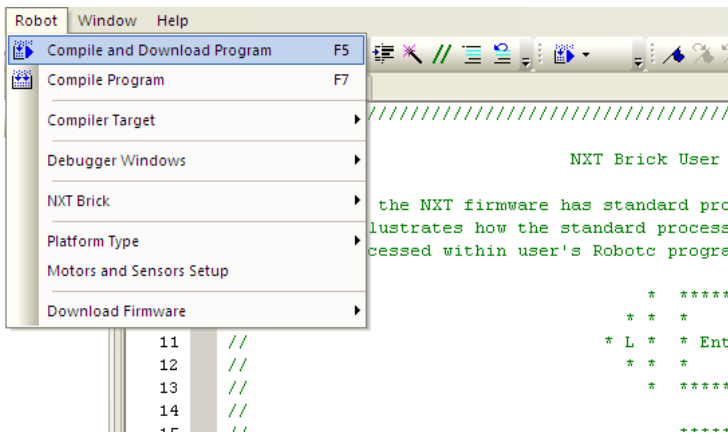

5. Select Product > ROBOTC for LEGO MINDSTORMS > Start Trial > Yes > Close > Close.
6. Click on Robot > Compiler Target > Physical Robot.

- Open the supplied file by going to File > Open and Compile > “pick the file from saved location” > **elevator.c** > Open

- Connect the LEGO NXT to the computer with a USB cable.
- In RobotC, download the supplied program into the Lego NXT brick.

- The device is now ready to be used.
